Name

XmlSessionManager

Attributes

-dbFact : DocumentBuilderFactory

-dBuild : DocumentBuilder-metaDoc : Document-numElementNode : int

Operations

+fileToDOM (file: File): Document

+importDOMToMetadata (node : Node) : MetadataNode<?>

+addDOMToTree (node: Node, root: MetadataNode): MetadataNode<?>

+printDOM (node: Node): void

+printMetadataTree (mNode : MetadataNode<?>) : void

+openSession (file : File) : MetadataNode<?>

+saveSession (root: MetadataNode<?>, currentNode: MetadataNode<?>): String

+metadataTreeToString (root : MetadataNode<?>) : String

+domTreeToString (node: Node): String

Name

MetadataNode

Attributes

-element : String
elementName : String

-answer : String-question : String-verified : Boolean

-child : MetadataNode <M>
-sibling : MetadataNode <M>

Operations

+getElement (): String

+getElementName (): String

+getQuestion (): String

+getAnswer () : String

+getVerified (): Boolean

+getChild () : MetadataNode<M>

+getLastChild () :MetadataNode<M>

+getSibling(): MetadataNode<M>

+getLastSibling () : MetadataNode<M>

+isLeaf (): Boolean

+removeLastChild () : MetadataNode <M>

+removeLastSibling (): MetadataNode <M>

+setElement (newElement : String) : void

+setElementName (newElementName : String) : void

+setQuestion (newQuestion : String) : void

+setAnswer (newAnswer : String) : void

+setVerified (newVerified : boolean) : void

+addChild (newChild: MetadataNode<M>): void

+addSibling (newSibling: MetadataNode<M>): void

+treeCopy(MetadataNode<M>): void

+treeSize(MetadataNode<M>): long

+inOrderPrint (): void

+preOrderPrint(): void

+postOrderPrint (): void

+print (int) : void

+printLeaves (): void
