Name

MetaXMLParser

Attributes

-dbFact : DocumentBuilderFactory

-dBuild : DocumentBuilder-metaDoc : Document-numElementNode : int-metaNode : MetadataNode

Operations

+metadataParse(file : File) : Document +metaTreeDoc(file : File) : Document

+treePrint(node: Node): void

+importDOMTree(dom: Document): MetadataNode

+addDOMTree(dom: Document, MetadataNode root): MetadataNode

+openSessionTree(file: File): MetadataNode +saveSessionTree(root: MetadataNode): String

Name

MetadataNode

Attributes

-element : String-answer : String-question : String-verified : Boolean

-child : MetadataNode <M>
-sibling : MetadataNode <M>

Operations

+getElement(): String +getQuestion(): String +getAnswer(): String +getVerified(): Boolean

+getChild() : MetadataNode<M>
+getLastChild() :MetadataNode<M>
+getSibling() : MetadataNode<M>
+getLastSibling() : MetadataNode<M>
+setElement(newElement : String) : void
+setQuestion(newQuestion : String) : void
+setAnswer(newAnswer : String) : void
+setVerified(newVerified : boolean) : void

+addChild(newChild: MetadataNode<M>): void +addSibling(newSibling: MetadataNode<M>): void
